**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to an exposure apparatus, classified in class 250, subclass 492.2.
  - II. Claims 14-20, drawn to an alignment apparatus, classified in class 250, subclass 559.3.
  - III. Claims 21-27, drawn to an alignment apparatus for in an exposure device, classified in class 250, subclass 548.
  - IV. Claims 28 and 29, drawn to a mask, classified in class 250, subclass 237G.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group III and I, II and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because an alignment apparatus can be used to align any type of object or with any type of mask. The subcombination has separate utility such as exposing absent any alignment, aligning workpieces, or as a mask or grating in an encoder.

Art Unit: 2878

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group IV is not required for Groups I-III, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Joseph Scafetta, Jr. on January 8, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
